

You would like to support your horse with an effective inhalation device?

We would be happy to assist you:

Probably the best inhalation device for horses. Convince yourself!

TECHNICAL DATA

SUCCESS STORIES

The SaHoMa®-II inhalation set for horses is equipped with the latest, modern technology:

Highest acceptance due to the light construction and almost noiseless operation

275 x 250 x 325 mm, 1,200 grams total weight

Use of mesh technology for optimal particle sizes for treatment of the horses upper and lower airways

5,14 µm MMD | 3,92 µm MMAD
approx. 45 % of the particles are ≤ 5 µm

Excellent aerosol delivery rate for a fast and effective inhalation therapy

0,8 ml NaCl / minute

Technical features

Automatic switch-off function
Continuous mode & time program
Integrated charge level indicator

The SaHoMa®-II inhalation set for horses is successfully used and recommended by many equine clinics, veterinarians, riding stables as well as professional and hobby equestrians:

Horse clinics

Tierklinik Telgte, Germany
Tierklinik Lüsche in Barkum, Germany

Showjumping

Paul Schockemöhle, Germany
Ludger Beerbaum Stables, Germany
Sportpferde Ehning, Germany

Eventing

Michael Jung, German Olympic Squad
Leonie Kuhlmann, German Junior Squad

Dressage

Hans Peter Minderhoud, Netherlands
Gina Capellmann-Lütke-meier, Germany
Dressurstall Rothenberger, Germany

... and many more

As a manufacturer of innovative and well-known inhalation devices for humans and animals, health is our top priority. We use our over 20 years of inhalation experience in human medicine to give your horse a healthy life. All the know-how and experience we have gained during this time flows into the development of our veterinary products and makes them unique.

Flexibility is important to me in almost every part of my life, so my horse's health should not be tied to a power outlet either. With the SaHoMa®-II inhalation set for horses I have Easy's respiratory disease completely under control, so that he is now very well again. And me as well!

APPLICATION & USE

Respiratory diseases are among the most common internal diseases in horses. The **inhalation therapy with the SaHoMa®-II inhalation set for horses** is the first choice for the treatment:

- Use for the **treatment and prevention of inflammatory and chronic respiratory diseases** in horses
- Support the respiratory system through **humidification and care** by using saline inhalation solutions
- **Inhaled application** of low-dose medications that **reach their destination directly** via respiration and develop their effect there **better and faster** than with systemic therapies - almost **without any loss of active ingredients and undesired side effects**
- The inhalation therapy **reduces the need for visits to the vet and can be carried out by the horse owner on a long-term basis and without great effort**
- Inhalation where, when and how your horse likes it best - whether **in the stable**, during **training on the lunge** or during a **leisure walk**

The field-tested inhalation set developed with veterinarians promises everything that is necessary for a quick and effective inhalation therapy. Compared to common inhalers, the difference of the SaHoMa®-II inhalation set for horses is in the details:

Transparent, without tubes and chambers

- Permanent monitoring of the inhalation process thanks to transparent construction
- Direct aerosol application in front of the horse's nose for immediate inhalation with almost no loss of condensation and an efficiency of over 70 %

Smart nebulization at the touch of a button

- Two programs for selecting the optimal nebulization mode depending on the used inhalation solution
- Integrated, automatic switch-off function after the filled inhalation solution has been completely nebulized

Different sealing rings for fit and tightness

- Easy and inexpensive adaptation to all horse noses
- To seal the system and avoid losses

Secure breathing

- Breathing without resistance for stress-free inhalation
- No contamination of the ambient air and no danger to surrounding living beings

Our service for you: A free and unbinding 14 days test

Because we know that an inhaler is a big purchase for many horse owners, while they do not know how the horse reacts to the inhalation, we offer you to test the inhaler **free of charge and without obligation for 14 days prior to purchase**. Because only if you feel safe with the inhalation device and, above all, your horse can inhale comfortably and without stress, an effective inhalation therapy can take place. **Interested? Please contact us for further information.**

ADVANTAGES

These attributes make the SaHoMa®-II inhalation set for horses a **unique, incomparable product** that is designed to support the health of your horse. Additionally, it offers the following **advantages**:

- **Wireless operation** via a **rechargeable, long-lasting battery** integrated in the inhalation mask for unlimited mobility
- Stress-free inhalation for the owner thanks to an **easy application and fast, hygienic cleaning**
- Reliable **application of medication and many other inhalation solutions** by using a **leak-proof mesh nebulization unit**
- **Highest quality** through the use of proven and biocompatible materials from human medicine
- All-round feel-good factor through **professional and individual support**
